AMENDMENTS TO THE CLAIMS

Please amend the claims as follows.

- 1-21. (Cancelled).
- (Currently Amended) A method of providing a voice dialogue in a telephone network, said method comprising:

directing a telephone call to a switch;

requesting, by said switch, routing instructions from a control point;

routing said telephone call to a Call Control Extensible Markup Language/Voice

Extensible Markup Language (CCXML/Voice XML) browser according to said routing instructions:

forwarding a request for voice instructions from said CCXML/Voice XML browser to a call control protocol to CCXML/Voice XML converter;

converting said request for voice instructions to said call control protocol using said converter:

forwarding said request for voice instructions from said converter to said control point; returning voice instructions from said control point to said converter; converting said voice instructions from said call control protocol to said CCXML/Voice

XML:

returning voice instructions from said converter to said CCXML/Voice XML browser; executing said voice instructions using said CCXML/Voice XML browser; and Application No. 10/840,176

Docket No. CHA920030033US1

running an application on a CCXML application server connected to said CCXML/Voice

3

XML browser.

23. (Original) The method in claim 22, wherein said converting process comprises

using a Hypertext Transfer Protocol (HTTP) server junction.

24. (Original) The method in claim 22, wherein said converting process comprises

using an Advanced Intelligent Network Session Controller.

25. (Original) The method in claim 22, wherein said converting process comprises

using a CCXML converter and a XML converter.

26. (Currently Amended) The method in claim 22, wherein said voice processor

CCXML/Voice XML browser and said call control protocol to CCXML/Voice XML converter

provides voice communications between a telephone user and a machine.

27. (Original) The method in claim 22, wherein said routing process routes said

telephone call to a voice extensible markup language browser and said converting process is

performed by a converter connected to said browser.

28. (Original) The method in claim 22, wherein said call control protocol is not

publicly available and said voice extensible markup language is publicly available.
